LOCUTU

THE **BEST KEPT SECRET** IN TELEMATICS

Reduce overtime, increase productivity and ultimately profitability

Locutu is a 21st century Telematics system which has all the features you need to control your fleet using GPS satellites to locate your vehicles, and the mobile phone network to ensure that all reported information is constantly up to date.

Web browser access to the information and reports means your data can be accessed from any web enabled device from anywhere in the world. For specialist and full office fleet management a simple to install client program is also available.

- All our standard hardware has in built accelerometers to detect poor driving behaviour such as harsh acceleration and braking.
- Our small vehicle mounted hardware can be tamper proof and be fitted discretely with the additional feature of tamper alerts when necessary.
- Downloadable 'apps' are available to permit fleet management from any modern 'smart phone' with the added benefit of instant call to mobile feature.

Real Time Alerts. Locutu can be configured to send real time alerts via email or Text on any of the alert-able functions such as over speeding, harsh braking and geofences.

Quick and easy trails, single click allows you to see where the vehicle has been for the last 30 minutes.

Driver Behaviour, with locutu you can get real time driver behaviour , with a single click you can view engine rev's, fuel guage, throttle position, engine temperature and engine load.

IMPROVE YOUR PRODUCTIVITY WITH LOCATU REPORTING

The most important element of any Telematics system is its ability to provide fleet operators information on how their fleet is performing with the information necessary to manage their vehicles and the service they deliver to their customers. Locatu has a comprehensive reporting suit which is easily accessed through the main screen. The most commonly requested reports are easily generated and provide a wealth of information.

Speed Report							
Vehicle: ACP (ash) Supreme		Report start: 00:00:00 23/07/2012		Report end: 18:00:00 23/07/2012		Maximum Allowed Speed (mph): 50	
Start Time	Start Speed (mph)	Start Location	End Time	End Speed (mph)	End Location	Maximum Speed (mph)	Duration (minutes)
23:40:28 23/07/2012	57	Ring Road Westwood, A6130	23:40:23 23/07/2012	67	Ring Road Westwood, A6130	57	0 minutes
23:40:23 23/07/2012	49	Ring Road Westwood, A6130	23:40:59 23/07/2012	56	Ring Road Westwood, A6130	66	+ 0 minutes
23:40:59 23/07/2012	56	Ring Road Westwood, A6130	23:41:00 23/07/2012	56	Ring Road Westwood, A6130	56	0 minutes
23:41:00 23/07/2012	57	A61, Leamington Spa	23:41:00 23/07/2012	57	South Approach, A61, Leamington Spa	60	0 minutes
23:41:00 23/07/2012	57	A61	23:41:00 23/07/2012	67	A61, York (S)	66	22 minutes
23:41:00 23/07/2012	56	A61, York (S)	23:41:00 23/07/2012	55	A61, York (S)	56	0 minutes
23:41:00 23/07/2012	56	A61, York (S)	23:41:00 23/07/2012	54	A61, York (S)	56	0 minutes
23:41:00 23/07/2012	57	A61	23:41:00 23/07/2012	52	A61, York (S)	57	+ 0 minutes
23:41:00 23/07/2012	57	A61, North Yorkshire	23:41:00 23/07/2012	52	A61, North Yorkshire County	52	0 minutes

Daily Report Provides a daily summary for a quantity of vehicle activity

Destination Report Shows every POI (point of Interest) visited for a specific vehicle over a selected period

Driving Event Summary Shows driver behaviour

Idle Report Details the extent of driver ignition or engine activity whilst NOT moving

Journey Report This list those vehicles which have incurred charges by driving on toll roads, bridges etc

Road Charging Report This list those vehicles which have incurred charges by driving on toll roads, bridges etc

Speed Report Reports on vehicles exceeding a specific time limit

Utilization Report Reports on how often your vehicle is used

Many other standard reports available , bespoke reports can be produced.

CANBUS FROM LOCATU

For most fleet operators our standard locatu product is more than they would ever need, however for some large haulage fleets it is vital that they get up to date information on how their vehicle is performing, including electronic tachograph information. When combined with the Core product it can provide driver behaviour training, this can result in significant fuel consumption savings of over 5%.

The Benefits of fitting a CanBus solution from ACP to your fleet:

- Access to CANbus data lets vehicle operators identify and address the causes of poor MPG and helps to reduce running costs and environmental impact simultaneously
- The solution reports on the status and health of the vehicle including safety systems such as Airbags, Anti-lock brakes and electronic stability protection.
- By relaying faults to the fleet operator, potential accidents can be averted, and vehicles can be recalled for repair, before minor faults turn into major system failures

If you need information from any vehicle, from engine revs to bucket position there is only one company to call...Locatu

So call today on 0845 901 1971

Locatu is based in Leeds with additional offices in London and Hull.

- We believe in constant innovation and have developed some of the best software in the telematics industry which is constantly and automatically updated as new features are added.
- Solutions that allow transport operators to save thousands on their fuel and routing costs and local authorities to make significant improvements vehicle efficiency.
- Comprehensive specialist experience in all aspects of Winter Maintenance vehicles including route compliance and gritter activity on all makes of gritting equipment.
- It is this experience that sets LOCATU well ahead of ALL competitors.
